Profile

Hi - I'm Thomas. I am 26 years old, born coder. I'm a full-stack web developer specialized in Python/Django. I got 0 and 1 running through my veins, I love solving problems and always eager to learn new things.

I studied finance-banking after my high-school diploma in CS. I have since found an unbridled passion for web development, of all things.

JavaScript, Angular, Python, and Django are my focus now even though I'm open to other technologies like Scala, React, etc. I just completed a boot camp focused on Python, and would love to join your team.

I also love learning foreign languages: French, English, Chinese, and a little bit of Japanese.
